

Introducing CPD Interactive

CPD Interactive is a feature rich, Web 2.0 solution for professional bodies and other organisations which will help your members manage their own CPD progress while assisting your organisation with sophisticated administration and reporting features.

CPD Interactive brings together CPD management systems with social learning networks to satisfy the requirements of both the professional body and the changing expectations of its members.

For Your Members :

Search :

Help your members find courses that are relevant to their needs, save courses to their basket for later and compare courses side by side to find the one that is best suited to their needs

Course Recommendations :

Prompt your members with courses that might be of interest. These training suggestions are intelligently tailored to the individual member based on their educational and professional profile.

Apply & Pay online :

Allow your members to apply and pay online for courses in a few easy steps. Our application's engine is completely configurable and can provide a payment gateway for your organisation or integrate with an existing payment system.

My Roadmap :

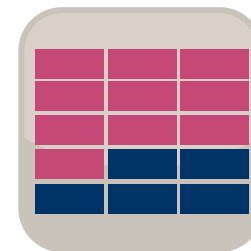

Allows your members to manage their CPD progress, create a plan of courses which they intend to do, review the courses that they have already completed and monitor their progress towards their CPD goal.

My Community :

An innovative social learning network for your members, allowing them to find similar members based on qualifications and employment history, share their CPD Roadmaps with other members and create private groups.

For Your Organisation :

Applications Management :

Allow your organisation to manage course applications in real-time. Features; an audit trail for each application, the ability to send emails to multiple applicants with a single click and also allows third party course providers to manage their own applications.

Content Management :

A fully featured content management system that enables you to build and administer your course database. Permits you to create, edit, hide or show and delete courses. It's also completely configurable, allowing you to select the information you want to use to describe your courses.

Reports :

A complete CPD reporting engine designed to allow a professional body to review, manage and report on the CPD progress of its members. Generate reports on the real-time status of your members CPD progress, view the CPD Roadmap for each user, assign mandatory or optional courses to users and more.
